

GM Performance Flex-Fuel Sensor 13577394

Brand: Competition Systems

Product Code: GM13577394

Availability: In Stock

Weight: 0.10kg

Dimensions: 20.00cm x 10.00cm x 5.00cm

Price: \$175.00

Short Description

These flex-fuel sensors make it easy to run either E85, pump premium or any other kind of race fuel without the need to remap every time you change fuels.

Description

These devices send data to your engine management system concerning the percentage of ethanol in your fuel; this allows you to adjust the ignition timing and fuel quantity to be injected. If you're receiving poor data, the result is poor performance. These high-quality Delco sensors use quick-connect style fuel inlet and outlet attachments for easier replacement.

Specifications

Inlet Size: 3/8 in.

Inlet Attachment: Quick-connect

Outlet Size: 3/8 in.

Outlet Attachment: Quick-connect
